- Finished all five "You Don't Know JS" books
- In-depth study of React docs, Redux, etc.
- Numerous web technology tutorials

Experience

6+ YEARS CODING
Websites, games & apps

8+ YEARS DESIGNING
Professional digital media

TECHNICAL SKILLS
With data, DBs and PCs

Multimedia Contractor & Educator @ WILSHIRE BLVD TEMPLE CAMPS

June 2018 - Present | Malibu, CA and Koreatown, Los Angeles, CA

- Developed curriculum for and instructed digital media classes for children ages 6-16.
- Directed, filmed, and edited several videos and short films using Adobe Suite.
- Received training in leadership, inclusivity, and other workplace values.

Lead Web Developer & Designer @ SENDERS COMMS. GROUP

Jan 2018 - June 2018 | Woodland Hills, CA

- Created beautiful webpages and sites for clients and internal campaigns/events.
- Wrote scripts for AWS DynamoDB & Cognito while developing union directory app.
- Developed React-based interface for browsing regional datasets about job listings.
- Was lead designer/layout on popular print publications with a national audience.
- Migrated, managed, and maintained fleet of company and organization websites.

Node.js Developer & Software Tester @ NEWSMAKER SYSTEMS

Dec 2015 - Dec 2017 | Northridge, CA

- Developed "NewsCaster Cleanup" application with NodeJS + React (see projects).
- Operated, supported and assembled a proprietary video automation server system.
- Configured, tested, and troubleshot SOAP & HTTP functionality in LAN servers.
- Was lead editor/designer during technical manual & documentation production.
- Developed fresh company website and UI designs for company software.

Featured Projects

Labor411.org Prototype

Mar '18 | ~800 Lines of Code

A web app prototype that allowed users to search a database of products and businesses that are considered union friendly. Used AWS Dynamo Database as data storage and retrieval, and AWS Cognito as login engine.

React | Gatsby | GraphQL | AWS | Netlify

NewsCaster Cleanup

Jul '17 | ~1550 Lines of Code

Utility application. Installs onto a client's video server, parses the server's database, detects the folder config, and looks for issues such as orphaned clips, missing folders, and duplicates. With this app, support techs can eliminate problem clips.

Node.JS | React | Electron | Windows Filesystem

♠ Hunter's Poker ♥

Dec '17 | ~1220 Lines of Code

An artistic draw poker game. Includes algorithm that assigns scores to poker hands. Fisher-Yates shuffle algorithm integrated for random deck shuffling. Opponent AI makes decisions based on real poker strategy. Playable demo available.

JavaScript Algorithms | React | CSS Animations | Gulp | Browserify
